

CR Dhan 100

(Satyabhama)*

(IR 31238-350-3-2-1 / IR 41054-102-2-3-2)

Product Profile

CR Dhan 100, also known as Satyabhama, is a 110-day variety released by ICAR-NRRI in the year of 2012. With medium height and medium slender grain, this variety is suitable for irrigated upland ecosystem where water deficit is recurrent. CR Dhan 100 exhibits resistance to leaf blight and rice tungro virus. The observed grain yield of this variety is 2.3 tons per hectare under drought condition and in favourable condition average yield of 4.7 tons per hectare can be realized. CR Dhan 100 has the tolerance to glume discoloration.

Priority Market Segment - TEMS-R

Planting Method		Ecosystem		
PTR	DSR	Irrigated Lowland	Rainfed Lowland	Upland

Positioning

Position	Irrigated Lowland	Rainfed Lowland	Upland
Replace	Khandagiri	None	None
Companion	Sahabagi Dhan	None	None

Key Strengths

- Fit for upland
- Medium slender grain; High HRR
- Early maturity
- Tolerant to major diseases and insect pests

Considerations

- Relatively low yield

Relative Variety Performance - Grain Yield, Agronomic Traits and Grain Shape

Variety	Grain yield		Maturity (days)	Plant height (cm)	Lodging	Shattering	HRR %	1000 grain weight (g)	Grain Shape
	(Kg/ha)	% Adv							
CR Dhan 100	2300-4700	47	105-110	100-105	Tolerant	Tolerant	67	20	MS
Khandagiri	3000-3200		90-100	85-90	Tolerant	Tolerant	64	21	MB

Relative Variety Performance - Biotic and Abiotic Stress

Variety	Leaf blast	Leaf blight	Brown plant hopper	Stem borer	Leaf folder	Drought
CR Dhan 100	Tolerant	Resistant	Resistant	Resistant	Resistant	Tolerant
Khandagiri	Tolerant	Susceptible	Susceptible	Tolerant	Tolerant	Resistant

Producibility: CR Dhan 100 = 1400Kgs. /acre

Recommendation: For planting in upland ecosystem in Odisha
