

DRR Dhan 42*

(IR-64 DRT-1)

(IR 77298-14-1-2-10 x

IR 77298-5-6-11)

Product Profile

DRR Dhan 42 is an early-maturing, medium height, long slender, high yielding and widely adaptable variety grown under irrigated lowland and upland conditions. It exhibits drought tolerance and performs well in water-scarce environments. Yield advantage is approximately 1.0 mt/ha over other varieties of similar maturity under drought stress conditions. Developed collaboratively by IIRR & IRRI and released in 2016, it is specifically recommended for cultivation in Southern and Central India. Additionally, DRR Dhan 42 showcases tolerance to lodging and grain shattering while delivering excellent grain and eating quality.

Priority Market Segment-TMeLS-R/DMeLS-R

Planting Method		Ecosystem		
PTR	DSR	Irrigated Lowland	Rainfed Lowland	Upland

Positioning

Position	Irrigated Lowland	Rainfed Lowland	Upland
Replace	IR 64	None	None
Companion	CR Dhan 500	None	DRR Dhan 44

Key Strengths

- High yield
- Drought tolerant
- Long slender grain
- Early maturity; Non-lodging; non-shattering
- Excellent eating quality
- Resistant to leaf blast

Considerations

- Sensitive to low temperature
- Susceptible to sheath blight
- Moderate HRR

Relative Variety Performance - Grain Yield, Agronomic Traits and Grain Shape

Variety	Grain yield		Maturity (days)	Plant height (cm)	Lodging	HRR %	1000 grain weight (g)	Grain Shape
	(Kg/ha)	% Adv						
DRR Dhan 42	5500-6000	33	115-120	100-105	Tolerant	56	26	LS
Sahbhagi Dhan	3800-4500		100-110	85-90	Tolerant	65	22	LB

Relative Variety Performance - Biotic and Abiotic Stress

Variety	Leaf blast	Leaf blight	Sheath blight	Brown spot	Drought
DRR Dhan 42	Resistant	Tolerant	Susceptible	Tolerant	Tolerant
Sahbhagi Dhan	Tolerant	Susceptible	Tolerant	Susceptible	Tolerant

Producibility: DRR Dhan 42 = 2200-2400Kgs. / acre

Recommendation: Released for cultivation in Telangana, Tamilnadu, Andhra Pradesh, Madhya Pradesh, Chhattisgarh, Jharkhand
