

# Nua Chinikamini

(Pure line selection of Chinikamini)

## Product Profile

A late-maturing, short bold grain aromatic rice derived from a landrace, Nua Chinikamini was released in 2011 specifically for cultivation in the rainfed shallow lowlands of Odisha. This variety is known for its strong aroma and exquisite sensory taste and used for kheer. It has desirable grain quality features such as translucent bold kernels, high head rice recovery, high elongation ratio (2.01), intermediate amylose content, and medium GC (57.7 mm). Due to its superior grain quality, it holds significant potential in premium markets.

## Priority Market Segment - TLsS-R

| Planting Method |                 | Ecosystem         |                 |                 |
|-----------------|-----------------|-------------------|-----------------|-----------------|
| PTR             | DSR             | Irrigated Lowland | Rainfed Lowland | Upland          |
| Recommended     | Not Recommended | Not Recommended   | Recommended     | Not Recommended |

## Positioning

| Position | Irrigated Lowland | Rainfed Lowland | Upland |
|----------|-------------------|-----------------|--------|
| Replace  | None              | Chinikamini     | None   |

## Key Strengths

- Pleasant aroma
- Translucent short bold grain
- High HRR, good yield in this segment
- Moderately resistant to sheath rot, sheath blight and blast
- High elongation ratio (2.01)

## Considerations

- Tall plant
- Average grain weight
- Photosensitive
- Average parboiling

## Relative Variety Performance - Grain Yield, Agronomic Traits and Grain Shape

| Variety         | Grain yield | Maturity (days) | Plant height (cm) | Lodging     | HRR % | 1000 grain weight (g) | Grain Shape |
|-----------------|-------------|-----------------|-------------------|-------------|-------|-----------------------|-------------|
|                 | (Kg/ha)     |                 |                   |             |       |                       |             |
| Nua Chinikamini | 3000-3500   | 145-150         | 135-140           | Susceptible | 67    | 18                    | SB          |

## Relative Variety Performance - Biotic and Abiotic Stress

| Variety         | Neck blast | RTV      | Sheath blight | Sheath rot | Stem borer | Gall Midge |
|-----------------|------------|----------|---------------|------------|------------|------------|
| Nua Chinikamini | Tolerant   | Tolerant | Tolerant      | Tolerant   | Tolerant   | Tolerant   |

**Producibility:** Nua Chinikamini = 1500Kgs. / acre

**Recommendation:** Released for cultivation in Odisha
