

Sahbhagi Dhan*

(IR 55419-42 x WAY RAREM)

Product Profile

Sahbhagi Dhan is an early-maturing, semi-dwarf variety characterized by long-bold grains, widely adaptable variety, mainly grown as direct seeded rice in rainfed and upland environments. Developed collaboratively by CRRRI, Hajaribag, and IRRI, it was released in 2009 for cultivation in Jharkhand and Odisha. Notably, it exhibits tolerance to drought and displays exceptional adaptability to water-scarce and upland environments.

Key Strengths

- Drought tolerant
- Semi-dwarf; Profuse tillering; High straw yield
- Long bold grain
- Early maturity; Non-lodging
- High HRR; Excellent eating quality
- Tolerant to Leaf blast, Sheath blight & Leaf folder

Considerations

- Susceptible to low temperature
- Low yield under severe drought
- Susceptible to Leaf blight

Relative Variety Performance - Grain Yield, Agronomic Traits and Grain Shape
